Social Media at a Glance

This is Cleveland County's social media benchmarking report for June 2026, covering Facebook and Instagram — each benchmarked against other NC counties on that platform. The sections below give every channel a full breakdown of posting volume, engagement, top posts, and content themes.

PLATFORM	POSTS (JUNE)	POSTS/WK	TOTAL INTERACTIONS	AVG/POST	VOLUME RANK
Facebook	141	32.9	15,819	121.7	#1 of 88
Instagram	34	7.9	201	5.9	#1 of 11

Instagram & X are newly tracked in GovFeeds this month, so those figures set a baseline (no month-over-month yet). Interactions = likes + comments + shares/reposts.

Facebook

141 posts · 121.7 avg interactions/post · #1 of 88 on volume · vs May month-over-month

Facebook is Cleveland County's largest social channel this month. Cleveland County stepped up its presence in June — 141 posts across 6 accounts (32.9/week), up 9% from May, ranking #1 of 88 NC counties (99th percentile). Engagement stayed healthy at 121.7 interactions per post, above the NC counties median of 19.7.

June produced 15,819 total interactions at 121.7 per post — ranking #3 of 84 NC counties for engagement, above the state median of 19.7. The top post (UPDATE: 2:00 Sunday afternoon. Alicia has been located ...) drove 2,263 interactions.

What stands out: Cleveland County's June content leaned into Animal Services (31.9%), Events & Community Activities (18.4%), Public Safety & Police (18.4%), with shares outpacing likes on several posts — a sign residents treat this content as practical information worth forwarding to others. On volume, Cleveland County is already inside the state's top 25%.

What the numbers mean: Posting volume is in the top tier of the state — the audience has a reliable information source. The next step is engagement depth: making the highest-effort posts (videos, milestones, spotlights) land with more reach.

For July: hold the top-tier cadence and keep deepening engagement — lean into the formats that already over-perform, and adding Government Information & Boards content (now 10.6pp below peers).

June 2026 Snapshot

METRIC	JUNE 2026	MAY 2026	CHANGE
