1 Ask in plain English

Describe the post you need. GovFeeds AI finds how peer governments handled it.

app.govfeeds.com

Draft a short, friendly Facebook post for a city warning residents about AI voice-cloning phone scams, where a scammer clones a loved one's voice to ask for money. Ground it in how peer governments have communicated this.

2 Get a draft built on real posts

It sums up what peers did, then drafts yours, with every source linked.

app.govfeeds.com

Based on how other local governments are handling this, here are a few examples and a draft post for your city.

Peer municipalities are taking an educational and preventative approach.

- **Baldwin Borough, PA** (2026-03-24) partnered with its public library to host an informational class called "Spot The Bot," teaching residents how to "spot red flags, understand voice cloning, and tell the difference between real and AI-generated audio."
- **Keene, NH** (2026-06-09) posted a direct graphic warning to residents about the nature of the scam.

The common thread is proactive communication to help residents recognize the scam before they fall victim. The tone is serious but helpful, not alarmist.

Here is a draft Facebook post you can adapt:

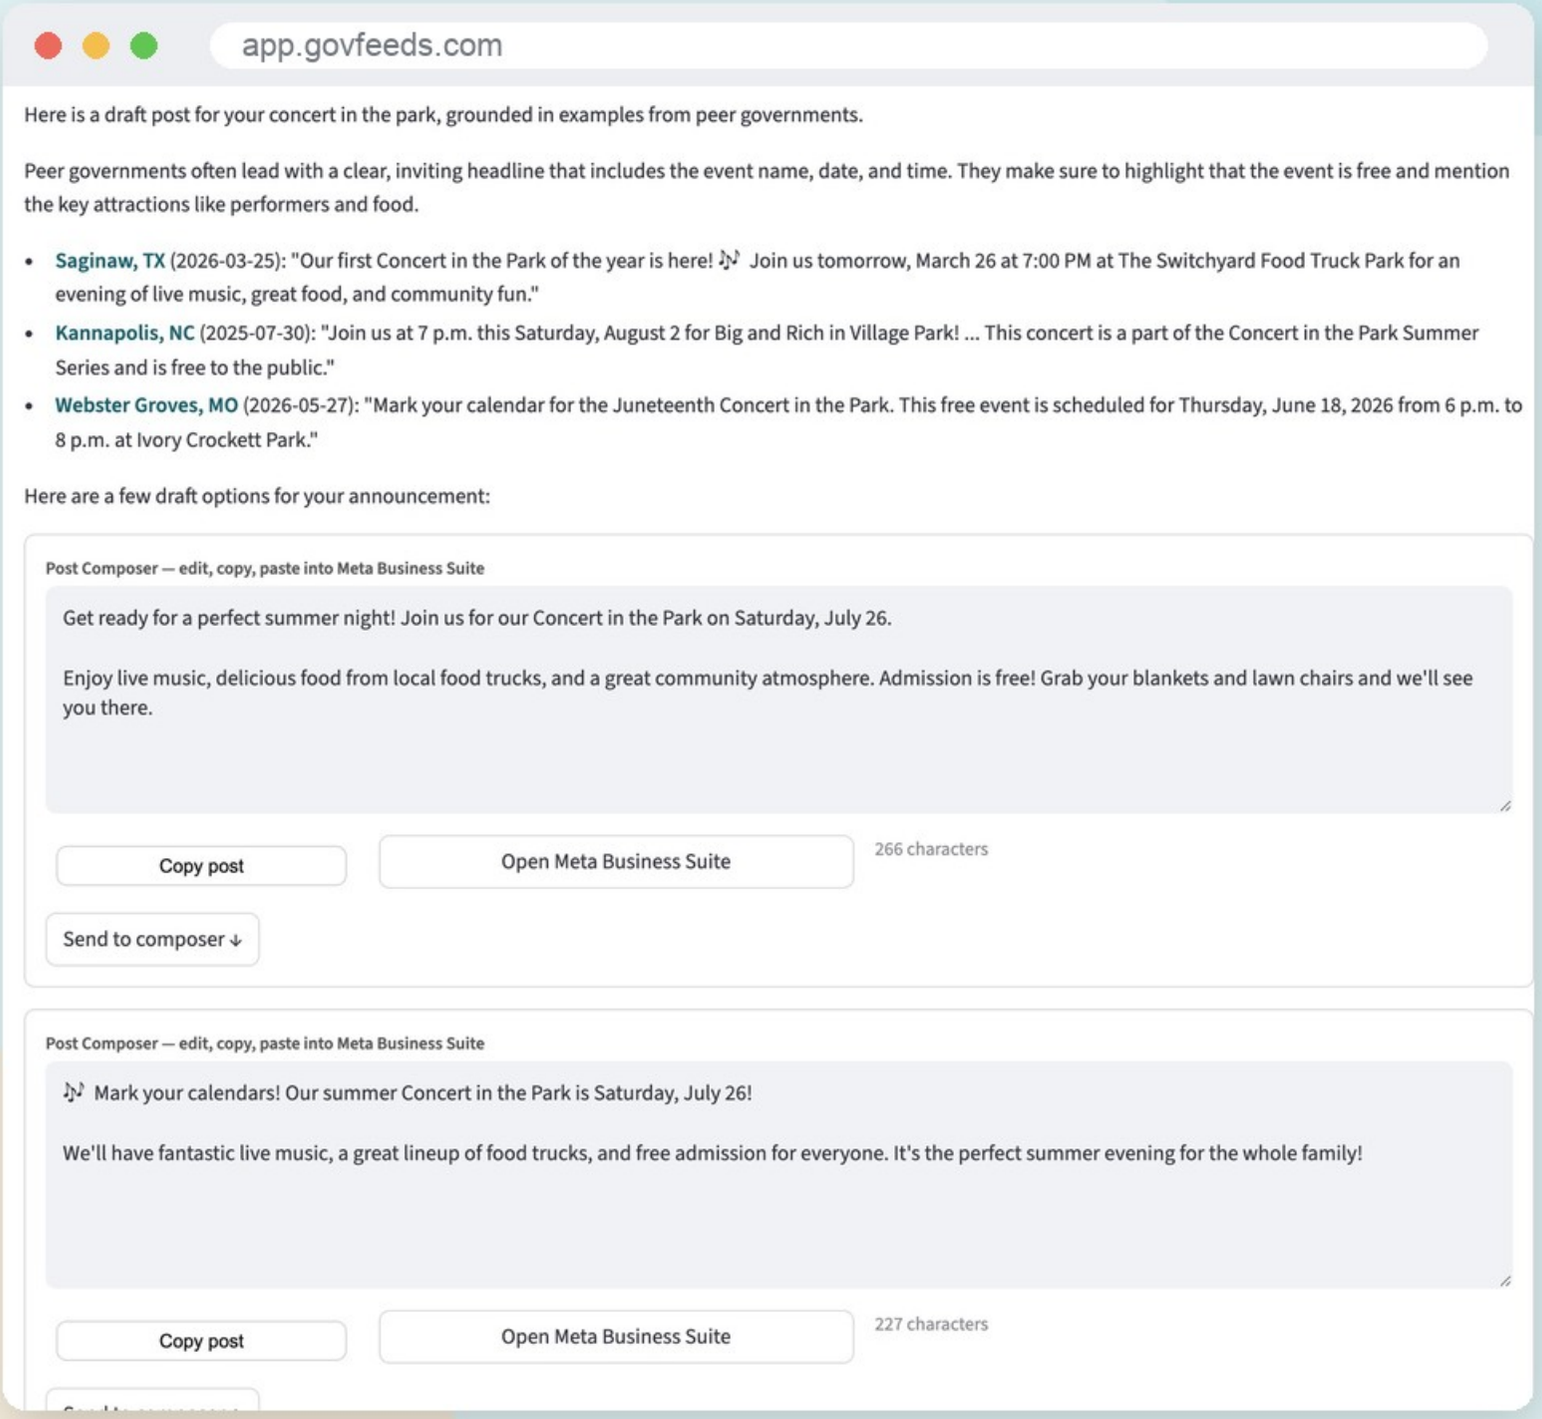

Option 1 (Direct & Simple)

Heads up, residents! Scammers are using AI to clone the voices of your loved ones. If you get a frantic call from a family member asking for money, it might be a scam.

The safest move? Hang up immediately and call them back on the number you have saved for them. Stay safe!

3 Edit, then copy it out

Polish it in the composer and paste it into Meta Business Suite.
